Larix Power extra (Capsulated) from Robios,
with a purity of at least 92%**

Certificate of State registration № RU.77.99.88.003.E.002184.05.18 от 30.05.2018
CAS No 480-18-2, **EINECS** 207-543-4 (Taxifolin)

Larix Power extra (Capsulated) contains:

- VitaRost Dihydroquercetin (Antioxidant), Purity 92+%, 100 mg
- VitaRost Arabinogalactan (Effective Prebiotic), 200 mg

One of the world's most powerful 100% natural antioxidants, the plant flavonoid Dihydroquercetin (DHQ, also known as Taxifolin), derived from Siberian or Dahurian larch wood, has powerful immunomodulatory and capillary-protective effects. Arabinogalactan (also known as Galactoarabinan) belongs to the carbohydrate class; it is a mixed, branched polysaccharide. It is a water-soluble dietary fibre and a prebiotic. Dihydroquercetin and Arabinogalactan are powerful natural bioregulators in human life. The larch trees we use to produce DHQ and AG are over 100 years old and grow in ecologically clean Siberian regions (the Republic of Sakha Yakutia, the Irkutsk region) hundreds of kilometres away from the closest human infrastructure. This, in turn, guarantees the raw material's original ecological compatibility.

Dihydroquercetin has a range of medicinal properties:

Has a marked anti-toxic effect, supporting the function of the immune system; prevents relapse of chronic diseases of the respiratory system, and with systematic use prevents the development of acute respiratory viral infections; combats inflammation in the body, having an anti-inflammatory effect; has radioprotective activity and minimizes the adverse effects of chemo- and radiotherapy on the body; shows gastroprotective activity, stimulating the regeneration of mucous membranes of the biliary. You can learn more about the use of DHQ for various diseases by following the QR code (on the right side of the page) on the Robios website.

Indications for use of Dihydroquercetin Larix Power extra (Capsulated):

- As a dietary food supplement - source of Dihydroquercetin; for the prevention of premature ageing;
- For the prevention of allergic conditions of various etiologies;
- For the prevention of cancer;
- Prevention of unstable angina pectoris, arrhythmia, heart failure and chronic coronary heart disease;
- In chronic tracheitis and bronchopulmonary pathologies and pneumonia;
- Protects the stomach and liver, activates the regeneration process of gastric mucosa;
- Has a positive effect on the nervous system, activates the nervous processes.

Larch Arabinogalactan, part of this dietary supplement Dihydroquercetin Larix Power extra (Capsulated), is an effective prebiotic, stimulates the immune system.

Daily intake of Larix Power extra (Capsulated)

For a healthy person one capsule of Larix Power extra (Capsulated), the dosage can be increased upon the recommendation of your doctor. It is recommended to take once a day with a meal, in the morning, with a small amount of water or juice. The duration of use is 30 to 40 days. 100 mg of the active ingredient in a capsule, Dihydroquercetin, is the upper limit of the recommended daily dose. Robios is one of the few manufacturers on the market to offer this dosage of DHQ in its capsules. A good synergistic effect would be to take it together with foods high in vitamin C, A, E, such as: orange, mandarin, lemon, strawberry, kiwi. It is important to remember that Dihydroquercetin does not accumulate in the human body, so it is recommended to be taken on a regular basis.

Not recommended: Children under 12 years of age, women during pregnancy and lactation. It is not a medicine.
Contraindications: Individual intolerance to the components. Hypersensitivity to bioflavonoids. Before use, it is recommended to consult with your doctor. In case of overdose - gastric lavage. Store in a dry place, protected from direct sunlight and out of reach of children, at a temperature not exceeding 25.
